

Process Flow Diagram: Glacial Acetic Acid Separation

Liquid-liquid extraction with ethyl acetate, followed by distillation for purification and solvent recovery

Operating Conditions:

- Feed: 10,000 kg/h (10 wt% acetic acid)
- Solvent: ethyl acetate (1.5:1 S/F ratio)
- Product purity target: ≥98 wt% AA
- Annual operation: 330 days/yr (7,920 h/yr)
